Career Objective

Seeking a position that allows me to apply my strong analytical and problem-solving skills, along with my passion for continuous learning, to make a positive impact and contribute to the overall goals of the organization.

Projects

PHP Simple To-Do List

Created a user-friendly to-do list web application to help us organize our tasks efficiently. The main idea behind developing this project is making use of technology, for making it easier for people to manage their tasks efficiently. I used PHP, HTML, CSS, JavaScript, MySQL to develop the application.

Laravel Task Manager App

Built a Laravel task manager application to keep track of our projects and deadlines. This application exemplifies a successful integration of comprehensive solution for individuals and teams seeking effective task management. I used Laravel, PHP, HTML, CSS, JavaScript, jQuery, AJAX calls, Postman, Mailtrap, MySQL to develop the applications.

Laravel Booking Management System

Created a booking system for hotel/resort to enhance the efficiency of booking process and provide a seamless experience for users and staff. This application provides users with user-friendly interface to make bookings. I used Laravel, HTML, CSS, JavaScript, PHP, MySQL, Apache server to develop this application.
